AGFHT 120° Full Height Turnstile

Description

The Autogate 120° full height turnstile is a sleek, contemporary design, as well as a robust, high specification turnstile engineered to exacting standards.

Manufactured to the highest quality our heavy duty turnstile is complete in all respects. Designed to give years of continuous use under tough conditions.

The AGFHT 120° is designed to control access in restricted areas where perimeter control is required, such as: theme parks, public buildings, stadiums, distribution sites, Building and offices. They are suitable for outdoor use and are offered at an excellent price with a 12 month warranty subject to our terms and conditions

A key feature of the AGFHT 120° is that it can be used for bi-directional pedestrian access control applications and has been designed as a modular system which can easily be assembled on site by hand and without the need of heavy lifting equipment.

In the event of a power failure all Turnstiles are fitted with a failsafe as standard. The Turnstiles may be operated by simple Stand-Alone Access Control readers through to

Complex Time and Attendance Systems.

The AGFHT is designed to be installed directly to concrete surfaces, or in the case of paved areas a steel footprint can be supplied at additional cost

The AGFHT is available in a wide range of finishes, as standard it comes with a textured powdered coated finish to standard RAL N° with the optional extra of galvanised finish or non-standard RAL colours.

Head unit

The AGFHT head unit has been engineered to the highest of standards with all parts being zinc plated.

Technology

The AGFHT 120° is rotated manually by the user but has a locking mechanism. The locking mechanism contains a cam plate and two locking solenoids. The unit is controlled by our SR2 B121BD controller.

This controller has been designed specifically by Autogate for this application. When the controller receives a

pulsed input, the controller releases the respective solenoid and allows the centre column to be easily rotated 120°. The centre column then locks back into position

Optional Extras

- LED overhead strip Lights
- Canopy Covers
- Swipe & Proximity Card readers
- Keypads
- Intercoms
- LED Directional Flow indicator lights
- DDA compliant Pedestrian gate
- Enclosure to incorporate access control devices
- Bespoke Signage

Technical Specification

Voltage	240V AC
Voltage (Solenoid)	24V DC
Frequency	50HZ
Current	6A
Duty Cycle	100%
Flow Rate	15 to 22/min in a single direction
Weight	230KG Approx.
